

**AMENDMENTS TO THE CLAIMS**

Please amend the claims as follows.

1. - 10. (Canceled)

11. (Currently Amended) A printing method,

wherein a computer displays a print acceptance screen ~~on the basis of~~ based on page data sent from a given node on a network,

the print acceptance screen comprising:

a first area for a user to specify a ~~peripheral device~~ scanner to acquire print data;

a second area for [[a]] ~~the~~ user to specify ~~a given condition~~ control information ~~for when the scanner peripheral device to use when acquiring~~ acquires the print data; and

a third area for [[a]] ~~the~~ user to specify a network printer on the network made to print on the basis of the print data, and

wherein the computer acquires the print data from the ~~peripheral device~~ scanner specified in the first area in accordance with the control information ~~given condition~~ specified in the second area and sends an acquisition/print request for printing to the network printer specified in the third area.

12. (Currently Amended) A printing method,

wherein a computer displays a print acceptance screen ~~on the basis of~~ based on page data sent from a given node on a network,

the print acceptance screen comprising:

a first area for a user to specify a ~~peripheral device~~ scanner to acquire print data;

a second area for [[a]] ~~the~~ user to specify ~~a given condition~~ control information ~~for when the peripheral device scanner to use when acquiring~~ acquires the print data; and

a third area for [[a]] ~~the~~ user to specify a network printer on the network made to print on the basis of the print data, and

wherein the computer sends an acquisition/print request to the ~~peripheral device scanner~~ specified in the first area to cause the ~~peripheral device scanner~~ to acquire the print data in accordance with the ~~given condition control information~~ specified in the second area and to send the acquired print data to the network printer specified in the third area, thereby causing the network printer to print.

13. (New) The printing method of claim 11, wherein the control information comprises resolution of the print data.
14. (New) The printing method of claim 11, wherein the control information comprises a mode of the scanner.
15. (New) The printing method of claim 11, wherein the control information comprises a number of pages of print data to obtain.
16. (New) The printing method of claim 12, wherein the control information comprises resolution of the print data.
17. (New) The printing method of claim 12, wherein the control information comprises a mode of the scanner.
18. (New) The printing method of claim 12, wherein the control information comprises a number of pages of print data to obtain.
